

VIAWEST Overview

Centered Around You.

This describes our commitment to the customer and taking care of their unique needs. It is what makes ViaWest unique as a company. Founded in 1999, ViaWest is one of the largest privately owned data center and managed services providers in North America, with 22 enterprise-class facilities in Colorado, Texas, Oregon, Utah, and Nevada.

Invested in growth.

Our 13 years of continual growth can be attributed to constant investment in our people, technology and data centers, to the tune of \$200 million in infrastructure investment in the last five years. And we have generated positive cash flows from operations since 2002.

Tailored, high-tech solutions.

Every customer is unique to us and receives individual attention to ensure they receive a custom-fit design with all their needs in mind. Our broad menu includes colocation, complex hosting, cloud computing, and managed services.

National company. Local feel.

We're committed to the communities that we serve by providing locally-based customer support service and staff in each data center. We also support local events, organizations and activities wherever we are.

No problem goes unsolved.

Our dedicated, proactive staff works tirelessly for each and every customer. That's why we guarantee 100% customer satisfaction and pride ourselves on 87% first-call resolution.

Expertise you can count on.

Our highly trained and certified staff has the knowledge to find you the right solution. And we're at the forefront of industry's compliance certifications and audits. ViaWest has received SSAE 16 Type II SOC 1 Report, SOC 3 Report, and PCI Report on Compliance for Sections 9 and 12.

Technology is evolving. So is ViaWest.

"Our transition to viaWest was completely invisible to the outside world, which is exactly what we wanted! viaWest has definitely alleviated headaches for the IT staff from the perspective of application availability."

» ACCOLADES

Technology company of the year. Understatement of the century.

Our CEO was Ernst & Young's 2009 Entrepreneur of the Year. And our company was CSIA's Technology Company of the Year.

Clientele

Extensive expertise in a wide range of industries.

Our current customer base spans multiple industries nationwide, numbering in the thousands. Lufthansa, Red Robin, Patron Tequila, Northrop Grumman, Akamai, Cricket, eCollege, Pinnacle Entertainment, Softlayer, the State of Colorado, Webroot, Chipotle, Symantec, The United Way, and Frontier Airlines are just a sample of the companies we serve.

Green Solutions

We never miss a chance to be green.

With high-efficiency water coolers, air-side economizers, high-efficiency lighting, thermal analysis, recycled building materials and PUE reduction, we're as devoted to the environment as we are to our clients.

Founders

Roy Dimoff (Chairman/CEO)

Mr. Dimoff is a recipient of Denver Business Journal's "Who's Who in Technology, Telecom and Media," CSIA's "Technology Executive of the Year" and "Technology Entrepreneur of the Year."

Nancy Phillips (Co-Founder & COO)

Ms. Phillips has served in a technology role at numerous telecommunications companies around the world and currently serves on the board of the CSIA and The National Center for Women and Information Technology. The Denver Business Journal has named her an "Outstanding Woman in Business."
